

AMPUTEE REHABILITATION

TREATMENT AND RECOVERY

Our Amputee Rehabilitation Program offers the clinical, technical, and professional resources necessary to provide individualized treatment and promote progress toward an independent lifestyle. Our program offers a seamless transition from acute hospitalization through inpatient and outpatient rehabilitation to home. Our caring team works to restore mobility, confidence and vitality to those who have experienced the loss of a limb.

- Meticulous follow through regarding the referring vascular surgeons' individualized patient protocols
- The Amputee Team, consisting of a Board Certified Physiatrist, Prosthetist, Physical Therapist, Occupational Therapist, and Wound Nurse
- Our in-house*, community-based# prosthetic laboratory produces highly functional and comfortable prosthetics
- Emotional support/psychological counseling in private and group settings
- Amputee Support Group meets regularly to provide peer support to patients and their families

**Braintree Rehabilitation Hospital only*

#New England Rehabilitation Hospital only

Patients can be admitted from an inpatient facility or from home. Patients can be admitted for gait training directly from home once they have received their prosthesis.

OUTPATIENT FEATURES

- Over 15+ years of experience in gait training adult and pediatric patients with numerous types of prostheses
- Our in-house*, community-based# prosthetic services enable patients to receive their prosthesis and have adjustments made quickly, thus minimizing time lost from therapy and recovery
- Amputee Support Group meets monthly and members are available to provide peer support at other times
